ROSS WAREHOUSE

Recently, eciService removed and replaced a heat exchanger for the Ross Distribution Warehouse located in Carlisle, Pennsylvania. The replacement unit was manufactured in Texas and was then shipped via truck to the warehouse. Stanton Baker with the help of Estep & Estep Incorporated removed the faulty unit and placed the new unit using extendable boom forklifts. The new unit measured 7' wide 16 1/2 ' long & 12' high. The final mechanical and electrical connections and start-up were successfully done by Stanton.

No job is too big or too small for eciService!
